

## WIRELESS LOUDSPEAKER OF THE YEAR

### Naim Audio Mu-so Qb 2nd Generation

| Reviewed in Issue 178

“The Mu-so and especially the Mu-so Qb 2nd Generation both show how hard that task must have been and how brilliantly Naim nailed it!”

**N**aim Audio's popular Mu-so and Mu-so Qb went through some root-and-branch changes this year in order to gain '2nd Generation' status. This was not an easy task because the success of the previous models meant there was a requirement to be at once conservative and revolutionary in product design, keeping the product's timeless lines while bringing it up-to-date and ready for the Twenties. The Mu-so and especially the Mu-so Qb 2nd Generation both show how hard that task must have been and how brilliantly Naim nailed it!

The new Naim Audio Mu-so Qb 2nd Generation relies both on the company's excellent app, but also makes set-up even easier thanks to a Google backbone, allowing quick installation into a home network using Google Home, as well as not sacrificing top music performance from home networks, SpotifyConnect and Tidal.

Best of all, the sound quality of the 2nd Generation model only improves upon the already excellent performance of the original Mu-so Qb. This is especially the case with voices, that take on a clarity and immediacy that borders on the uncanny. It's the perfect partner for music around the home!
